DETAILED ACTION

Information Disclosure Statement

1. US 4,427,251 teaches a driveshaft mechanism and US 5,014,564 teaches an electrical connector, these patents have not been considered by the examiner because they have nothing in common with the claims and for that matter with the invention. It is wondered if applicant meant to cite these references.

Allowable Subject Matter

2. Claims 16-25 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claims 16 and 17 have been found to be allowable over the prior art of record because the prior art fails to teach or suggest an apparatus for producing a titanium dioxide slurry comprising: a micronizer that produces an output comprising titanium dioxide and steam; a condenser that receives the micronizer output and combines the micronizer output with a first titanium dioxide slurry to condense the titanium dioxide and steam mixture and produces a resulting titanium dioxide slurry.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faye Francis whose telephone number is 571-272-4423. The examiner can normally be reached on M-F 6:30-3:00.
